

SureDrop

3 REASONS: WHY SUREDROP?

SureDrop is a versatile and accessible solution to the secure filesharing and storage challenge. Suitable for any organisation that needs to regularly share commercially sensitive or confidential data, it provides market-leading security without compromising on performance or user experience.

1

SECURITY ↙

What makes SureDrop unique amongst filesharing and storage solutions is that it was built from security-first principles, by a cybersecurity firm, allowing users to collaborate with confidence.

FEATURES

- ✓ **Advanced**, standards-based encryption
- ✓ File fragmentation security
- ✓ Zero-trust key management
- ✓ Integration with anti-virus and DLP software
- ✓ Designed from **security first principles**
- ✓ Optional Votiro Cloud malware protection

2

EXPERIENCE ↙

Security shouldn't come at the expense of usability. SureDrop features a familiar user interface and comes with a wide range of enterprise application integrations, straight out of the box.

FEATURES

- ✓ Support for **all file types and sizes**
- ✓ Integration with Microsoft 365, Azure and Outlook
- ✓ Support for Google Authenticator, Active Directory and ADFS
- ✓ Simple, intuitive user interface
- ✓ Securely share and **collaborate on files from anywhere**
- ✓ Complete version history and un-delete function

3

MANAGEMENT ↙

SureDrop can be deployed on-premises or in the cloud. The admin console provides centralised management of all users and functionality, including automatic provisioning of new users.

FEATURES

- ✓ Centralised management
- ✓ Automatic provisioning of new users
- ✓ Full audit history
- ✓ Unlimited file copying for backup and recovery
- ✓ **100% control** over data location
- ✓ **One click** deployment with Docker

SureDrop

SureDrop is brought to you by Senetas, a leading developer of cybersecurity solutions. Trusted to protect enterprise, government, and defence data in over 40 countries, Senetas hardware and software solutions are all built on the same crypto-agile platform and provide security without compromise.
